

INSTALLATION INSTRUCTIONS

GEISER OFF-ROAD PROGRESSIVE SPRINGS

When installing your progressive springs, we recommend having a qualified mechanic perform the installation.

All original stock spring dampers and isolators should be kept and the used when installing your Geiser Off-Road springs.

Each spring has Geiser printed on them. This will help you to know which end goes up.

- GEN 1 Geiser is upside down
- GEN 2 Geiser is right side up

GEN 1

You can run this spring in any position the most common is mid perch.
